TO THE CONSERVATORY CENTRE

To whom it may concern,

From the beginning of the project we felt at ease and in good hands with Terry, who informed us of the choices and how they could be achieved.

The builders arrived and we realised how skilled and efficient they were in their work, which was to a very high standard. The fitters also worked to a very high standard.

Both builders and fitters were trustworthy and were only too pleased to help and see that everything went smoothly.

There was a slight measurement problem, the builders had gone to another job but came back at short notice and resolved the issue – Thank you Richard!

The construction soon started to come together and exceeded our expectations.

Well done to the whole team at Conservatory Centre, we will certainly be recommending you to our family and friends.

Thank you and good luck for the future.

Yours truly

Elaine and Gez Weston (and sister Lynne)
