

OUR CONSERVATORY

BY Elaine Weston

We had a trip to Melbick's
On a sunny day
We looked around
And saw a man standing in a bay

He was selling conservatories,
Some big and some small
We said we were interested
And he gave us a call

He came out for a visit
We really were impressed,
Arranged to have one built
And put him to the test

The builders came and built
A wall about two foot high
It didn't take them very long
And then they said "Goodbye"

Then the day came
For the fitters to come along
The problem was they couldn't start
As the measurements were wrong

The fitters phoned the builders who
Made the wall much higher
As soon as this was done
They were really on a flyer

Piece by piece they fixed
It all together
They were very patient
And also very clever

Now we look outside
And the only thing we see
Is a lovely spacious room
In our conservatory
